

Module List

Product/Service		Description
Admissions	CORE	Provides inquiry/prospect tracking, interviews and visits, follow-up letters and statistical reporting.
Enrollment Management	ADD-ON	Tracks sending and receiving of contracts. Replicates your current enrollment and re-enrollment contracts processes. Includes tracking, follow up letters and statistical reporting.
Financial Aid	ADD-ON	Tracks the management of the financial aid application process, needs assessment, and notification of grants and Financial Aid Awards. System integrates with third party solutions such as SSS and COMP ASSIST.
Web Components Student/Parent Community Online Inquiry/Application Online Enrollment/Re-enrollment	WEB	<i>See the My Backpack Web Portal Applications and Services sheet for a detailed description of these associated web based products.</i>
Business Office	CORE	Includes Accounts Receivable, Accounts Payable and General Ledger.
Accounts Receivable	CORE	Includes tailored Tuition Billing, Charge Posting, Cash Receipts, Statement generation and Aged Trial Balance reporting.
Accounts Payable	CORE	Includes Purchase Order processing with encumbrance, Vendor Invoice entry with detailed expense distribution, Cash Disbursement cycle, Vendor History and 1099-vendor processing.
General Ledger	CORE	Provides Debit/Credit entries, Trial Balance, Detailed Audit Trail, Department Activity reports, and Budget and Income reporting. Activities from other Senior applications are automatically posted to the General Ledger.
Budget Management	ADD-ON	Provides department heads with secure access to their account balances and budgets. Includes summary and detail reports. Allows views of Budget, Beginning Balance, Activity, Ending Balance, Unexpended Balance, Unencumbered Balance, Budget Percentage Change, and more.

Purchase Requests	ADD-ON	Allows anyone with access to the Budget Management System to fill out purchase forms online and route them to the proper supervisor for approval. The purchasing coordinator can then convert approved requests to purchase orders.
Online Budget Management	ADD-ON	Provides the functionality from both the Budget Management and Purchase Requests modules in an easy-to-use web application that does not require any Citrix licensing, thereby facilitating a larger number of users with no additional licensing cost. Browser-based application includes graph widgets to display budget and spending data.
Fixed Assets	ADD-ON	Allows easy access to all important asset information such as purchase date, date in service, PO #, vendor, price, model, serial number, location and more. Allows each asset to be created in the Accounts Payable module through the invoice entry screen. Provides views of historical and projected depreciation transaction periods. Records warranty details and asset photographs. Provides preventative maintenance and automatic reminders. Define unlimited Asset Classifications, such as (Land, Building, Equipment, Vehicle, etc.) for reporting.
Web Components Student/Parent Community Online Enrollment/Re-enrollment	WEB	<i>See the My Backpack Web Portal Applications and Services sheet for a detailed description of these associated web based products.</i>
Academic Office	CORE	Includes the Registrar, Dean's Office, and Scheduling modules.
Registrar	CORE	Includes Centralized Grade Posting, Transcripts, Report Cards, ranking, weighted averages and reports by class and profiles.
Dean's Office	CORE	Includes student attendance and discipline tracking, monitoring, and follow-up. Boarding schools can track weekend sign outs and permissions.
Scheduling	CORE	Includes Student Course Scheduling. Faculty and Department Scheduling can also be incorporated. Includes base scheduling with block or modular scheduling with user defined terms, marking periods and conflicts display, add/drop tracking.

Schedule Builder/Loader	ADD-ON	Processes Student Course Requests by course or by student, and generates and loads a master schedule. Flexible sorting feature with real time schedules by student, period, department, faculty and course name.
Teacher Administration	ADD-ON	Allows teachers to enter all their grades and comments directly into the system. After the grades have been entered, exception reports can be run, necessary corrections made, and grade reports can then be quickly printed and distributed. Homeroom teachers, advisors, or each classroom teacher can also enter attendance directly into the system.
Placement	ADD-ON	Tracks students through college search and placement process. System provides for checklist of required items by school, contact and deadline information as well as profile reports.
Web Components Faculty/Staff Community Daily Gradebook Student/Parent Community Online Enrollment/Re-enrollment	WEB	<i>See the My Backpack Web Portal Applications and Services sheet for a detailed description of these associated web based products.</i>
Alumni/Development	CORE	Provides Constituent Management including Campaign, Appeal and Prospect Maintenance. System includes robust reporting, pledge and gift processing (payments, stock, In-kind) for multiple campaigns and appeals. Includes relationship management with constituent labels, biocards, phon-a-thon and management reporting with comparisons to previous and consecutive years.
Events Management	ADD-ON	Provides management of fundraising events including vendors, attendees, expenses, revenues and event details such as schedules, seating arrangements and all transactions.
Web Component Alumni/Development Community	WEB	<i>See the My Backpack Web Portal Applications and Services sheet for a detailed description of these associated web based products.</i>

Campus Store	CORE	Provides Cash and Charge transactions entered at point-of-sale using barcode technology. Either a "debit card" or credit system can be implemented. Restrictions, as requested by parents, can be placed on student charges. Receipts are printed and transactions are posted to the student account for inclusion in the student's statement. Faculty, Staff and Department charges are also processed.
Summer School/Extended Programs	CORE	Provides enrollment, student, faculty, staff scheduling and tracking for summer school programs and classes, summer camps, and other extended programs such as extended day, day care, or evening classes.
Web Components Online Summer/Program Reg. Faculty/Staff Community Daily Gradebook Student/Parent Community	WEB	<i>See the My Backpack Web Portal Applications and Services sheet for a detailed description of these associated web based products.</i>
Web Hosting/SaaS (Software as a Service)	SERVICE	The Senior Hosted Solution uses Citrix Presentation Server technology to host applications and ensure a secure user experience. No data is transmitted to local workstations without explicit permission from the end user. All of our servers for hosting services are located in a SAS 70 Type II co-location facility in Boston, Massachusetts. The facility is staffed and monitored on a 24/7/365 basis to ensure maximum performance and security. Data backups are performed at regular intervals, and then stored on tape-based media locally and transmitted to a secure remote data center.

Contact your area Senior Systems representative at 888-480-0102, option 2 for additional information or email sales@senior-systems.com. Visit www.senior-systems.com for a more complete description of modules, integration, security, technology features, as well as current hardware specifications.

My BackPack™ Web Portal Applications and Services

My BackPack™ Product/Service	Description
Student/Parent Community	Includes information on all students currently enrolled or enrolled for the fall. Students have online access to their class schedules, grades and comments, current year attendance, homework assignments, and school directory. Parents have access to all of the above, plus current account balances and statements, credit card/eCheck payments, transaction history, and donations.
Online Inquiry/Application	Automates your admissions process by streamlining procedures in a safe, secure web-based application. Customized with your school's branding, inquiries and applicants enter their data online and have it sent directly to the database via an approval process. Applicants can also view the status of their application requirements which are continually updated from our Admissions module. The information is seamlessly integrated and stored real-time in our Senior database. Payments can be conveniently made online by credit card/eCheck.
Online Enrollment/Re-enrollment	Processes enrollment and re-enrollment forms in real time online. Tracks enrollment/re-enrollment process online with quick glance icons. Easy to read quick view table shows pending actions. Sibling information linked automatically. Family histories are pre-populated for easier updating. Changes are automatically updated in Admissions and Registrar. Customizable, online step by step instructions. Also processes digital signatures.
Online Summer/Program Registration	Allows online registration for summer school, summer camp, or any type of extended program classes and programs. Updates the Senior Summer School module with relevant data via an approval process. Payments can be conveniently made online by credit card/eCheck.

Faculty/Staff Community	Includes schedule of current classes, class roster with student/parent information, current years for each class, address information, entry for marking period grades and comments, homework entry, course recommendations, daily/class attendance, faculty schedules, and student infractions and disciplinary history.
Daily Gradebook	Web based daily grade book for teachers. From the convenience of home or school, teachers can manage grades, comments, attendance and reports via the web. With Daily Grade Book, your data is integrated into Senior Registrar.
Alumni/Development Community	Includes address information, biographical information, donations, pledges, class notes, and a search for classmates in the alumni directory.
Web Services	The Senior Web Services are a set of API's that allow third-party application developers to get information from and post information to the Senior Database. This allows schools to create sophisticated portals where the users can see and update the latest information stored in the Senior Database. Web Services provide information regarding constituents, students, parents and faculty and allow the update of the biographical and address information. In order to help ensure the security of the disseminated information, any third-party application developer is required to sign an agreement with Senior Systems acknowledging the confidentiality and proprietorship of the data.
Web Hosting/SaaS (Software as a Service)	The My BackPack hosted server provides a secure login using an SSL certificate. All of our servers for hosting services are located in a SAS 70 Type II co-location facility in Boston, Massachusetts. The facility is staffed and monitored on a 24/7/365 basis to ensure maximum performance and security.
