Faculty / Staff Community

The Faculty/Staff community provides a robust feature set for today's busy faculty and staff members.

Teaching faculty have the ability to enter attendance, grades and comments, student infractions and student recommendations for upcoming classes. Teachers also can enter student homework assignments and view their up-to-date schedule.

Faculty and staff also have access to student biographical information along with student schedules, infractions, discipline and current and historical grades and comments. Schools with the Daily Grade Book can also see assignments in an organized fashion for all classes.

The Faculty/Staff Community includes all faculty members and administrative staff.

Information currently available to the Faculty/Staff Community includes:

- Student schedules
- Class roster with student/parent information
- Enter current year grades and comments for each class
- Student and parent address information
- Enter course recommendations
- Enter daily and class attendance
- Faculty schedules
- Student Disciplinary history
- View attendance entered for each student
- Enter homework assignments
- Send e-mail to students/parents in each of your classes
