SeniorSystems

Providing Administrative Solutions to Independent Schools

The Complete, Integrated Solution

Senior Systems provides a comprehensive, integrated single-database, information management solution to help streamline your school's operations. Since 1992, Senior Systems' primary focus has been to provide the finest administrative software and services to K-12 independent schools. Our client/server and relational database allows your school to track students' information from initial inquiry through graduation and to continue tracking them after they become Alumni/ae. Admissions, Accounts Payable, Accounts Receivable, General Ledger, Registrar, and Alumni/Development share information and data including charts of accounts, family linking, parent information, new applicant enrollment and re-enrollment information. In addition, with the My BackpackSM Communities, our web-based product, a single login can remotely access data from these application modules.

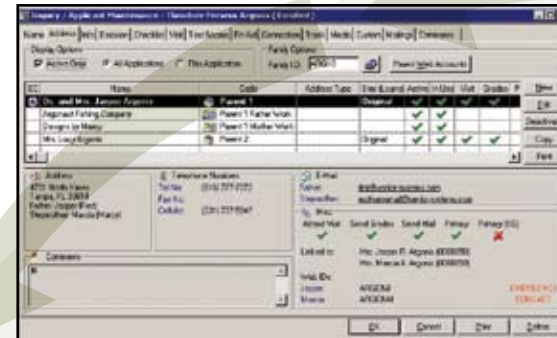

Integration

Since the initial design and release of our products, we have consistently maintained our goal of providing a true, integrated system that resides in a single database. The benefit of this vision is to reduce the redundancy of student information and better streamline your student and staff records. This provides you with a more cohesive and singularly focused office environment. Throughout our modules, shared look-up fields are used to better manage the consistency and integrity of your data. All look-up fields are maintained in a central location with the appropriate security levels. Any changes made to the look-up values are applied consistently to all modules.

Senior Applications

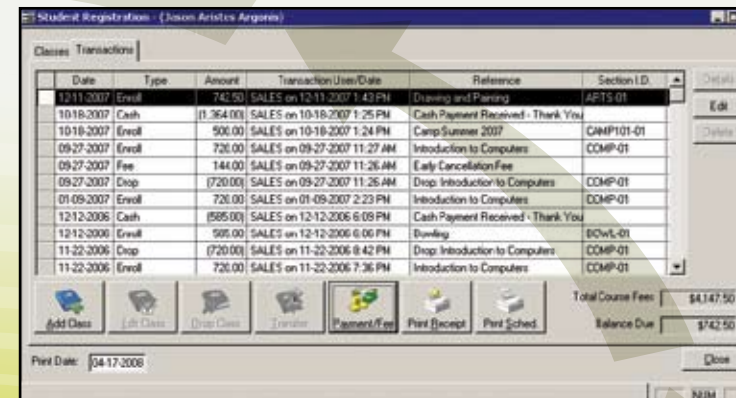

Our complete solution is comprised of four core modules: Admissions, Business Office, Registrar and Alumni/Development. Each core module has a number of additional add-on modules, which can be purchased separately to further enhance the core system. In addition, specialty modules, such as Campus Store and Summer School, have been developed to help round out Senior Systems' complete suite of application modules. All of these modules are augmented by our web based products, web services, web hosting and comprehensive services.

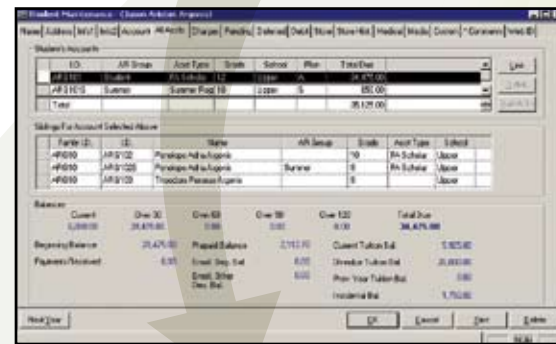

Admissions Inquiry/Applicant Maintenance

Comprehensive Services

Our seasoned management team provides our clients with the best possible services, including a three-phase conversion, on-site specification meetings, on-site installations, on-site training, online training, and superior product services. Powerful enhancements and features are continuously added to meet the growing needs of independent schools. Our long-term vision is to provide quality software products and services to ensure that each K-12 independent school is effectively and efficiently run. With this in mind, we provide a variety of solutions for all types and sizes of schools, and will customize our solution to fit your school's budget and technology plan.

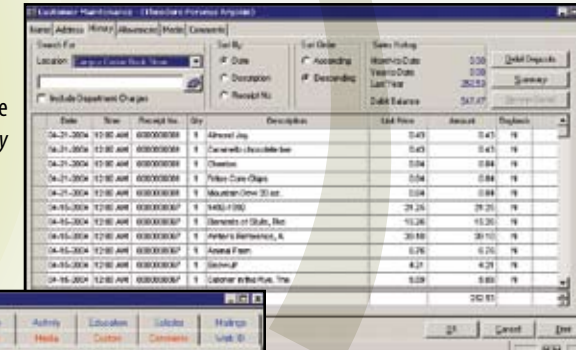

Summer School Student Registration

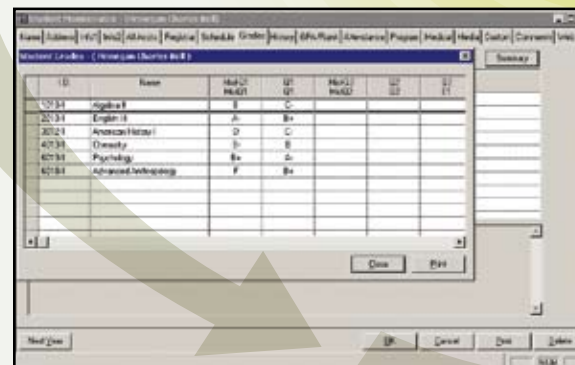

Business Office Accounts Receivable/Student Accounts

Campus Store Student/Charge History

Registrar Student Grades

Alumni/Development Constituent/Giving Summary

Oracle

Oracle can greatly improve your school's performance and efficiency while running the Senior Systems' software applications. Oracle consistently outperforms the competition especially when processing large amounts of data or when large numbers of users are simultaneously accessing the database.

Web Accessibility

Senior Systems' My Backpack provides secure web access to schools on the go. The current My Backpack consists of the Student/Parent Community, Online Inquiry/Application, Online Enrollment/Re-Enrollment, Online Summer School, Faculty/Staff Community, Daily Grade Book, Alumni/Development Community and Board/Trustee/Friend Community. With one login, you can gain access to all the data which is available from each of your school's communities. In addition, with the Daily Grade Book, teachers can more easily and conveniently enter daily grades via the web. This dissemination and entry of data couldn't be simpler or more secure.
