

Keep your finger on the pulse of your school with Dashboard for each core module.

You know you need the right information at the right time to effectively manage your school, but there's a lot going on. You want to keep up with changes as they are happening. You need to see the big picture at a glance, but you also want to drill down into the details. You don't want to have to run a new report or log into multiple applications just to get an update. You want a set of dynamic, up-to-the-minute analyses customized just for you, with exactly the data you need. And you want it be available with a single click, no matter which application you're currently using.

Dashboard Features

- Create and configure as many widgets as you need, organized onto multiple tab-style pages if necessary.
- Widgets can be instantly re-arranged, expanded and contracted just by clicking and dragging
- Select from several types of charts—bar, pie, line, area, or funnel—or choose a gauge or grid/table format
- Configure to select data by date ranges and other criteria, or use a query to narrow the dataset
- Just click on a chart segment to drill down to data details
- Customize to set titles, labels, legends, colorsets, backgrounds, and other formatting details
- Re-configure at any time to change format, labeling, or data selections
- Security features ensure that dashboard users can only view data for which they are authorized
- Share widgets or even entire dashboards using export and import functions
- Publish non-interactive versions
