Online Summer School | My BackPack

A self-service solution for summer and other programs increases efficiency, productivity, and customer satisfaction. My BackPack can handle the registration process in a customizable, user-friendly way. You can manage multiple programs simultaneously, each with its own registration dates and policies. Control courses and programs, manage deadlines, and administer fees and payment schedules, all while data automatically feeds into to your student information system and accounting software.

Features

- Enables self-service via a link on your school website
- Screens, instructions, and automated email responses can be extensively customized to reflect your programs and to optimize user experience
- Registration forms and course selection screens can be customized for your programs
- The system can be configured to set deadlines, deposit policies, payment schedules, and fees that reflect your operations
- Parents can register multiple children, select courses and programs, pay online and print receipts, manage print schedules, and submit any additional items your school might require
- Integration with Summer School enables data to be automatically uploaded via an approval process, and offers the ability to make changes and corrections - saving time and ensuring accuracy

ONE DATABASE DESIGN

Allows data to be shared and instantly updated to all school departments, ensuring data integrity.

The entire school faculty and staff will be able to do their jobs more effectively when they are able to access critical updates in real time, across all departments. Our single, centralized database integrates data from students, parents, applicants, all modules, and any selected third-party vendor that has established a relationship with us.

Get the modules you need now and add more when your school is ready.
