

Placement | Academics Add-on

Your Placement Office provides guidance and administrative tracking for students' searches and applications for their next educational steps, whether that is college or some other subsequent institution. You need a tool that can collect and manage all the details for college visits and applications, requirements and deadlines, and institutional contacts and mailings, as well as provide reports and data for comparisons, prioritization, and analysis. You need accuracy and efficiency so nothing falls through the cracks. And your placement software needs to integrate with your student information system, to avoid the need for duplicate data entry.

Features

- School Scattergram feature allows families to compare college choices based on past student GPA and standardized test scores
- Track college visits and school-sponsored trips
- Customizable checklists to track all requirements for each application
- Integration with Registrar eliminates need to enter student biographical information, grades, etc.
- Track applications by student or by college/institution
- Easy data entry and mailing functions to maintain contact information for colleges and institutions
- Extensive reporting and data export for analysis at summary and detail levels, with option to mask student name with a Placement ID for anonymity

ONE DATABASE DESIGN

Allows data to be shared and instantly updated to all school departments, ensuring data integrity.

The entire school faculty and staff will be able to do their jobs more effectively when they are able to access critical updates in real time, across all departments. Our single, centralized database integrates data from students, parents, applicants, all modules, and any selected third-party vendor that has established a relationship with us.

Get the modules you need now and add more when your school is ready.
