

Bring productivity and efficiency to your extended programs with Summer School.

Summer camps and summer schools can vary widely and so can their administrative needs. Some are academic summer schools offering a similar syllabus to regular schools. If that's you, you'll need a complete student information system, with grading and transfer of credit to student transcriptions. Other summer schools are unrelated to mainstream school activities. To manage these programs, schools need an information system that is totally flexible. It needs to be able to handle multiple programs simultaneously, just like your school and staff. But it also needs to be able to integrate seamlessly with your student information system and your accounting software. Summer School is a fully featured information and management system designed specifically for the unique needs of your extended programs: it's there for summer schools and summer camps, and everything else you do.

Summer School Features

- New student entry wizard to tie new registrants to existing student records
- Maintain checklists of forms or other requirements with automated mailings for missing items
- Quick and easy entry of registrations and payments, with waitlist and transfer processing
- Full grading and attendance capabilities; transfer grades for summer school courses to student transcripts
- Extensive reporting and data export for summary and detail data and schedules
- Integrates with Registrar and Accounts Receivable to share student and payment data
- Integrates with General Ledger for payment and revenue posting
- Add the Online Summer/Program Registration option for My BackPack™ to allow parents to register, select courses and programs, and make payments online
- Add the My BackPack™ Student/Parent Community to provide student and parent access to homework, grades and comments, and biographical data
